

AUTOWATCH 329Ti FEATURE LIST
 IBC Approved 3-Circuit Touchkey Immobilizer

1-800-646-3132

STANDARD FEATURES

IBC/ULC APPROVED	The first after market anti-theft device approved by the Insurance Bureau of Canada (IBC) and tested by the Underwriter's Laboratories of Canada (ULC) on behalf of leading insurance companies.
INSURANCE DISCOUNT ELIGIBILITY	IBC recommend that a 25% discount on the comprehensive part of the premium be given to policyholders that install an approved device.
3-CIRCUIT IMMOBILIZER	Three vital circuits are automatically disconnected 30 seconds after the ignition is switched off.
SECURITY HOUSING	Patented anti-tamper security housing resists attack by sawing, hammering and other common methods of attack. Prevents the thief from bypassing the system even if located.
FAIL SAFE CIRCUITRY	Built-in safety feature ensures that it is impossible for the immobilizer to arm when the vehicle is being driven.
STATUS LED	Attractively integrated into the touchkey receptacle. This provides nighttime illumination of receptacle and visual warning to a potential thief.
ADDITIONAL TOUCHKEYS	Up to eight touchkeys can be programmed into the System. This allows multiple users access to one vehicle e.g. company vehicles.
DIGITAL CODING	Four billion code variations ensure secure disarming.
BLACK WIRING	All wires used are identical in size and colour making them unidentifiable to a potential thief.
IMPORTANT!!! EMERGENCY PIN CODE OVERRIDE	System may be disarmed by unique PIN code if touchkey lost. Pin is also used for programming additional touchkeys. This is an important feature (Never be stranded), the system never becomes obsolete even if all touchkeys are lost. If your PIN number is lost call toll free for assistance. 1800 646 3132
